TOGETHER FIRST
A global system that works for all

Form complete?	Organisation name:	Is organisation?
Yes	Together First	Yes
[illegible] emerging technology	**[illegible] political [illegible] inclusivity or accountability**	**Short**

Global catastrophic risks mitigated | **Risk multipliers managed** | **Implementation timeframe**

[illegible]

Weapons of Mass Destruction pose an existential threat to life on earth. They serve no useful purpose, and can never be used without committing an atrocity.

[illegible] to come into force as a consequence of this renewed attention.

[illegible]

In addition to the proposal's own merit, it could demonstrate the efficacy of the model of treaty based prohibitions, for the better management of global risks through treaty processes and the establishment of international standards.

[illegible] their use. In this same manner it is not politically acceptable to advance an argument for retaining biological or chemical weapons on the grounds of deterrence.

The Treaty on the Prohibition of Nuclear Weapons (TPNW), adopted at the UN in July 2017, grew out of a series of conferences on the humanitarian impact of nuclear weapons. It showed the powerful transformative approach of addressing problems in global politics through the lens of catastrophic risk. It fills the gap in our global system and asserts that when it comes to the unacceptability of weapons of mass destruction, there is no nuclear exception.
